STONING CHINESE - Last week some twenty of the newly-arrived Chinese were shipped and sent up to the Ulupalakua Piantation. The night after their arrival some native rufflans from the other side of Mani, visited the place, and throw stones at the lodging-house of these laborers, one of the stones kitting a chinaman in the face and seriously cluring him. The gung immediately went to the inuse of the proprietor and inquired if they could set be protected? THE TRADE WINDS .- The earth turns on its axis from west to east, and with it rotates daily the enormous envelope of the atmosphere. The velocity of relation at the equator is something over 1,000 miles nn hour: at thirty degrees distance it is about 150 anes, uses, miles less. In higher latitudes it as still less, and at the poles nothing. Therefore, whenever the air mores north or south on the surface of the earth it will carry with it less or greater velocity of the rotation than the place it passes over, and will turn into an easterly or westerly wind, according as it aypreaches or recedes from the equator. In the region of the sun's greatest heat the air, rarified and lightened, is continually rising, and cooler cur-rents come in on both sides to take the place of the ascending volume. As these side currents come from a distance of about thirty degrees from the equator they have, at starting, an eastward relo-city many miles an boar less than the localities they will eventually reach. Consequently they will appear to sag behind in all the course of their progress to the equator—that is, they will have a westerly motion united with their north and south movements. These are the great trade winds, blowing constantly from the northeast on this side, and the southeast on the other side of the equator - Fogular Science Monthly.

To Monsienr Ballien, Commissioner of the French Republic to the Hawaiian Government.

Sir, by two decrees of the date of 4th and 13th of this month, the Fresident of the Republic has decided that a Universal Exposition of the products of Agriculture, of Industry and of the Fine Arts, shall be opened at Paris, the 1st of May, 1878, and shall be closed the 3ist of October, of the same year.

The head Commission of the products and Ulupalakua on Mani, and Hilo. At each of these places, it was made a day of recreation an international exhibitions. The head Commission of international exhibitions The head Commission of international exhibitions instituted by the Minister of Agriculture and Commerce, has been charged with determining the conditions under which the Exposition of 1875 shall take place, the rules under which the products and merchandise, which may be admitted, shall be placed. As soon as the rules and the programme which are now being constructed, are definitely settled, I shall hasten, Sir, to send you copies; I confine myself, to-day, to beg that you will be pleased to notify the Government to which you are accredited of this new international gathering, and

to request their valuable co-operation.

This appeal will be understood, I have no doubt; all governments will respond to it with sympaths; assured as they are of the advantages of these great solemnities, where the people contract new alliances, find useful and mutual instruction, and thus insure the development of their prosperity by labo
